

Figure 1. Epigenetic Clock Validation and Performance

Figure 2. Substance-Specific Epigenetic Age Acceleration

A. Epigenetic Age Acceleration by Substance

B. Effect Sizes

C. Dose-Response (Methamphetamine)

D. EAA During Recovery

E. Polysubstance Effect

Figure 3. Mediation Analysis: Mechanisms of Epigenetic Aging

A. Mediation Path Model

B. Mediation Effects

C. Proportion of Total Effect Mediated

Bootstrap 10,000 iterations | *** $p < 0.001$, ** $p < 0.01$, * $p < 0.05$

Figure 4. Sample Characteristics

Figure 5. Brain Region-Specific Epigenetic Age Acceleration

A. Sagittal Brain Section - Regional EAA

B. Regional EAA Statistics

Figure 6. Intervention Duration and Epigenetic Age Reversal

Bubble size proportional to sample size | Linear regression with 95% CI

Figure 7. Forest Plot: Meta-Analysis of EAA in Substance Use

Figure 8. Clinical Decision Algorithm for EAA-Based Risk Stratification

EAA = Epigenetic Age Acceleration | Based on multi-clock consensus
